-
38. Name any one immunisable disease caused by bacteria.
-
39. Give any one effect refraction of light.
-

SECTION B: (60 MARKS)

(Questions 41 to 55 carry four marks each)

40. Match the following types of joints with their locations in the body correctly.

Types of joints

Location in the body

Gliding joints

Elbow and knee

Pivot joints

Wrist and ankle

Ball and socket joints

the neck

Hinge joints

Shoulder and hips

- i) Gliding joints
- ii) Pivot joints
- iii) Ball and socket joints
- iv) Hinge joints

42. a) Which part of the following crops can be used for producing alcohol?

- i) Millet
- ii) Cassava

b) Name the fungus which is used in the production of alcohol.

.....

c) Apart from waragi, give any other example of an alcoholic drink.

.....

43. The diagram shows the composition of air. Use it to answer the questions that follow.

- a) Name the gases marked with letters B and D

i) B

ii) D

b) Identify any one process that involves use of gas C.

c) State any one way in which gas marked A is important to people.

44. a) What is paddock system of grazing?

b) Identify any one other rotational system of grazing apart from the above.

c) Mention any two advantages of zero of grazing.

i)

ii)

45. a) Write any one example of each of the following components of a solution.

i) Solute

ii) Solvent

b) How can you separate a mixture of beans and stones?

c) Give a method of separating mixtures used when getting juice from passion fruit.

46. The diagram below is of a simple circuit. Use it to answer the questions that follow.

a) Name the part labeled C

b) What is the function of the part named in (a) above?

c) What is the similarity function between part C and B?

d) Describe one energy change that takes place at A when the circuit is completed.

47. a) State any two roles children play in a home.

(i)

(ii)

b) Identify any two forms of child abuse in our society.

(i)

(ii)

48. a) Name the second stage of the life cycle of a locust.

b) State any two diseases spread by cockroaches to people.

i)

ii)

c) How can you help family members to reduce cockroach infestation in a home?

Goat, Wind, Sisal, Petroleum.

a) Name any two items from the list that are renewable resources.

i)

ii)

b) Identify one item that is a fossil fuel.

c) Give one way people can use the resource that starts with letter "S" in the list above.

Use the diagram below to answer the questions that follow.

a) Name the parts marked with letter P and Q

P

Q

b) How is part marked R adapted to its function?

.....

c) Identify one immunisable disease of the system above.

.....

51. a) Distinguish between a pest and a parasite.

.....
.....

b) Mention any two pests that destroy maize in the garden.

(i)

(ii)

c) Describe any one way farmers control pests on the garden.

.....

52. a) What name is given to a mixture of two or more metals?

.....

b) Give one example of a common mixture of metals?

.....

c) Why do people use aluminum to make cooking utensils instead of silver that is a better conductor of heat?

.....

d) By what process does heat move through metallic utensils?

.....

53. a) What is germination?

.....
.....

b) Give any two conditions necessary for germination to occur.

- (i)
- (ii)

c) What type of germination does a millet grain undergo?

.....
.....

54. a) What germ causes malaria?

.....
.....

b) Why does the government of Uganda periodically give out free mosquito nets instead of selling them to people?

.....
.....

c) Why would the control of malaria be more difficult than control of AIDS?

.....
.....
