THE SIPRO EDUCATIONAL SERVICES LIMITED - KAMPALA

PUBLISHERS OF THE SIPRO TEACHERS' GUIDES, LEARNER'S WORKBOOKS & PUPIL'S COMPANIONS

- 1. Name the class of food which repairs worn out body tissues.
- 2. State the way plants depend on animals during photosynthesis.
- State any one way of keeping a VIP latrine clean after use.

The diagram below is of a common simple machine. Study and use it to answer questions 4 and 5.

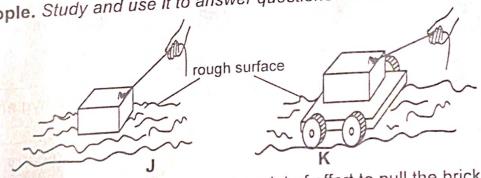

- 4. Identify the group of simple machines to which the one shown in the diagram above belongs.
- 5. Use an arrow and letter R to label the part where the effort is applied on the simple machine above.
- 6. Mention any one disadvantage of prolonged use of artificial family planning methods.
- 7. Give any one example of a crop with nodules on its roots.
- 8. How is lack of vitamin D a danger to one's skeletal system?
- 9. State one way regular bathing improves the health of the skin.

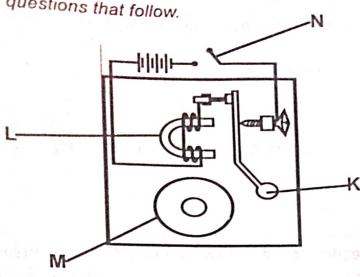

- 10. Name the accident caused by shortage of oxygenated blood supply to the brain.
- 11. Mention any one example of a layer that makes up the soil profile.
- 12. How is the amount of water vapour in the atmosphere measured at a weather station?
- 13. State any one use of soap in the cleaning of clothes.
- 14. Name any one material used in the making of charcoal briquettes at home.
- 15. Mention any one sign that helps a goat farmer to know that her nanny goat is ready for mating.
- 16. State any one way lungs are suited for breathing in people.
- 17. Give one way of keeping one's beddings clean after use.
- 18. Mention any one way biological changes are important to living things.

The diagram below is of two bricks being pulled by two different people. Study and use it to answer questions 19 and 20.

- 19. Who of the two people above uses a lot of effort to pull the brick?
- 20. Give a reason to support your answer in number (19) above.

21.	How is wringing an important step in the process of cleaning of clothes?
22.	State the main reason why ready crops are harvested in dry seasons.
23.	Mention any one way livestock farmers harm cattle on grazing fields.
24.	Name the immunisable disease which affects the brain.
25.	How is reproduction in mushrooms similar to that in ferns?
26.	Give one way of controlling the dangers of alcoholism among school going children.
27.	Name the method used to separate the different fuels in crude oil.
28.	How are carrots different from cassava in the way they are propagated?
29.	Apart from the use of hooks, give one other way plants with weak stems climb others.
30. l	How do blood platelets prevent entry of germs into the body when one gets a cut on the skin?
31. N	Mention any one activity a school child can do to promote oral hygiene.
	Calculate the Mechanical Advantage of a wheelbarrow used to carry a load of 1200N using an effort of 400N.

a) Name the	parts	labelled	with	letters	N	and	M.
-------------	-------	----------	------	---------	---	-----	----

(1)	N	<u> </u>		Ü	
/ii\	BA				

- b) How is part labelled with letter K useful in the functioning of the bell?
- c) Briefly explain what happens to part L when part N is pressed.

45. a) Give the method of obtaining coal from the ground.

- b) State any two ways coal can be used as an energy resource.
- (i) _____
- c) Apart from coal, name one other example of a fossil fuel.
- 46. a) Name the two main layers of the skin.
 - i)______
 - b) Give one way the skin regulates body temperature on a cold day.
 - c) Name the skin disease which causes loss of hair and red round patches on the skin.

P.7 INTEGRATED SCIENCE MID - TERM II EXAMINATION - 2024

BITICAL THINKING AND EXPERIENCE ACTUAL LEARNING WITH THE ACTIVITY BOOKS, SEMAS, TR'S GUIDES AND PUPIL'S COMPANIONS

one.	e type of pulley system which gives a	a mechanical advantage of
b) How does	the above named pulley system sin	nplify work?
	ny two uses of pulleys in our daily lif	e.
ii)	In the San	
	lain what happens to the lungs and di	aphragm when one breathes
i) lungs		
ii) diaphragm		
i)i		Hanne en ag ar an estal lag
a) Identify the	e questions that follow. nail burning candle methods of heat transfer labelled with	h letters Q and P.
b) Name the h transfer ma	nygienic activity that requires the use rked with letter P .	of the method of heat
- Villy does to	he method of heat transfer marked Q	occur in liquids and gases?
		of the district

SECTION B: 60 MARKS

Questions 41 to 55 carry four marks each.

Name the types of soil that have the following p	roperties;	
i) large and rough particles		
ii) moderately sized particles and spaces		
b) Mention the natural fertilizers obtained from house leftover food and peelings.	se hold refuse	e like
c) Apart from applying manure, give one other way fertility.	of improving	soil
2. a) Give any two ways dysentery spreads among pe	ople.	<i>J.</i>
ii)		
b) How does untreated dysentery lead to dehydratic	on in babies?	Silver State
0) \$24.4		7 31 1/10
c) State any one way the spread of dysentery can be	e controlled in	a home
	e controlled in	a home
(a) State any one way the spread of dysentery can be a second of dysente	e controlled in	a home
a.a) Mention any two examples of useful bacteria.	e controlled in	a home
i)i	e controlled in	a home
i)ii)ii		78 to 1

33. State any one activity in the wet season done to reduce competition for nutrients among crops in a school garden.	r soil
34. Mention any one soil pollutant controlled through recycling wastes.	
The diagram below is of part of the human ear. Study and use it to answer questions 35 and 36.	7. 1
Y	
35. Name the part of the ear marked with letter Y.	- 1 1 1
36. How is part marked with letter N useful to a person walking along the	road?
37. State the main reason why the handle of an iron box is usually made	of
wood.	
38. Why do children in young farmer's club prefer rearing exotic rabbits t	o local
breeds of rabbits?	
39. Why are plants grouped under renewable resources?	-Vi,
40. State any one advantage of growing perennial crops.	

) State the way a me	osquito and a cockroach spread diseases;
) How does the use	of insecticides control insect vectors in a home?
a) Name two exampl	es of vaccines administered against Tetanus.
	sites where the following vaccines are administered in
babies;	
I DOO VACCING	
ii) Hepatitis B	
ii) Hepatitis B In the table below, p	part M shows the terms used in the study of part N shows their meaning in a wrong order. N: their meaning
ii) Hepatitis B In the table below, p measurements and	part M shows the terms used in the study of part N shows their meaning in a wrong order.
ii) Hepatitis B In the table below, p measurements and M: terms	part M shows the terms used in the study of part N shows their meaning in a wrong order. N: their meaning
ii) Hepatitis B In the table below, p measurements and M: terms mass	part M shows the terms used in the study of part N shows their meaning in a wrong order. N: their meaning mass per unit volume
ii) Hepatitis B In the table below, p measurements and M: terms mass weight	part M shows the terms used in the study of part N shows their meaning in a wrong order. N: their meaning mass per unit volume amount of space occupied by an object
i) Hepatitis B In the table below, p measurements and M: terms mass weight volume	oart M shows the terms used in the study of part N shows their meaning in a wrong order. N: their meaning mass per unit volume amount of space occupied by an object gravitational force exerted on an object
i) Hepatitis B In the table below, p measurements and M: terms mass weight volume density	oart M shows the terms used in the study of part N shows their meaning in a wrong order. N: their meaning mass per unit volume amount of space occupied by an object gravitational force exerted on an object
i) Hepatitis B In the table below, pressurements and M: terms mass weight volume density Select from the table	nart M shows the terms used in the study of part N shows their meaning in a wrong order. N: their meaning mass per unit volume amount of space occupied by an object gravitational force exerted on an object amount of matter a body contains the correct meaning of terms and write it in the
