the instructions carefully:	FOR EXAMINERS' USE ONLY		
This paper is made up of Sections A and B.			- 1
Section A has 40 short-answer	Qn. No.	Marks	Final Mark
questions. (40 marks)	1 - 10		
Section B has 15 questions. (60 marks)	11 - 20		- ,
Answer All questions. All answers	21 - 30		
to both Sections A and B must be	31 - 40		
written in the spaces provided. All answers must be written using	31 - 40		
blue or black ball point pen or ink.	41 - 43		
Diagrams should be drawn in pencil	44 - 46		
Unnecessary alteration of work	47 - 49		4 4
may lead to loss of marks. Any handwriting that cannot be	50 - 52		
read may lead to loss of marks.	53- 55		•
Do not fill anything in the boxes indicated	d		-
For Examiners' Use Only.	TOTAL		1

is on Nesser Rd, Plot 11/13,Opposite Asia Agro Industry, Tel:0312-114706 / 0774-488552 / 0705-004730, Minyana faxi park on Kamusese building Rin1 Kampala Stage Tel:0753396322 Luweero-Kasana Next to the District play ground Tel: 0781731643, Tororo Tel: 0782520834 / 0705508135

SECTIONA

Questions 1 to 40 carry one mark each.

Give one example of a fossil fuel.

Why are infants immunised	against	TB at birth?
---------------------------	---------	--------------

State the reason why one should wring clothes before drying?

What role do bacteria play in the production of alcohol by fermentation?

5. How are blood capillaries able to allow exchange of materials in the body?

Who is a drug dependant? 6.

> The diagram below shows a method of writing music. Use it to answer questions 7 and 8.

- 7. Name the method of writing music shown above.
- How can the written music be useful to man? 8.
- Give the characteristic that makes birds different from other vertebrates. 9.
- Mention any one way of controlling tsetseflies in our environment. 10.
- State the first step in the process of preparing sugar salt solution (SSS). 11.
- 12. By what process does heat travel through liquids?
- How can the spread of diarrhoeal diseases be controlled in a community? 13.
- 14. Give a reason why farmers dock female sheep.
- 15. How are clouds formed?
- Why should boiled drinking water be covered in clean containers? 16.

- 17. What problem do crop farmers in Uganda face today?
- 18. Give any one indicator of spoilt food.

The diagram below shows two containers of the same size holding the same amount of water. Use it to answer questions 19 and 20.

- 19. In which container will water cool faster?
- 20. Give a reason to support your answer in number 19.
- 21. Name the part of the digestive system where emulsification of fats occur.
- 22. Give any one health concern in your community.
- 23. Write down any one example of drug abuse.
- 24. Mention any one factor that reduces the volume of blood in the body.
- What can be done by a family to prevent difficiency diseases among its members?
- Name the component of soil plants use to manufacture starch.
- 27. Name the germ that causes Newcastle disease in poultry.
- 28. At what stage of growth does a maize plant develop prop roots?
- 29. Why does a fish die after sometimes when it is removed from water?
- 30. How does an organisation like TASO help in the control of AIDS in Uganda today?

The diagram below shows a method of making a temporary magnet. Use it to answer questions 31 and 32.

- 1. Name the method of making a magnet shown above.
- 2. Using letter N, show the north pole on the piece of iron above.
- 3 Give one way through which scabies spread.
- 4. What first aid can you give a person that has been bitten by a poisionous snake?
- 5. Why is debeaking a very important activity in poultry management?
- 6. How does refridgerating preserve food?

The diagram below shows a human tooth. Use it to answer questions 37 and 38.

- 37. Name the tooth shown above.
- 38. How useful is the above tooth in human?
- 39. State one characteristic of molluscs.
- 40. Why should PHC activities be strengthened in the community?

SECTION B (60 MARKS)

Questions 41 to 55 carry four marks each.

- 41 a) Name the gas fuel that is produced after fermenting animal and plant material
 - b) Give one animal product that can be used to produce the gas fuel named a

- How is the gas fuel named above useful to man? c)
- Why would you advise Ugandans to use the above gas fuel? d)

The diagram below shows the body structure of the cattle. Use it to answer the questions that follow.

- 42. a) Name any one cow with the above body structure.
 - Under what type of cattle can you group the cow with the body structure above? b)
 - C) How can a cattle farmer improve the quality of the above type of cow?
 - d) Give one problem faced by farmers who keep the cattle with the body structure shown above.
- 43. Give one example of a physical change in the environment.
 - Write down any two characteristics of a chemical change. b)
 - i)
 - ii)
 - How are biological changes useful in our environment? C)
- In which unit is heat energy measured? 44. a)
 - Name one substance that can change from liquid state to gas state when b) heated?
 - What happens to pure water at a temperature of 212°F? C)
 - How can we conserve heat energy in the environment? d)

The diagram below shows a part of the skeletal and muscular system. Use it t answer the questions that follow.

Name one device that is used to reproduce stored sound	
--	--

- How does sound move from a teacher to pupils during a lesson?
- :) What is the meaning of the term volume as used in the study of sound?
- d) State any one way echoes are important to people.
- a) Name the part in the reproductive system of man that produces sperm.
- b) Mention any one primary sex characteristic in girls.
- c) Give **one** way through which gonorrhea can affect the reproductive system of a boy.
- d) How can one protect himself /herself from the dangers of gonorrhoea?
- a) Name the enzyme that digests carbohydrates in the duodenum.
- b) Give the substance that provides acidic condition in the stomach.
- c) What happens to digested food in the ileum?
- d) Why does the ileum have finger-like structures called villi?

Below is a life cycle of a type of mosquitoes. Study it carefully and use it to answer questions that follow

- a) Name the type of mosquitoes that undergo the above type of life cycle.
- b) How dangerous are the mosqquitoes that undergo the above life cycle
- c) State the best way mosquitoes are controlled at the egg stage.

7

d)	Besides mosquitoes, give one other example of insects that undergo the above life cycle.
a)	In which degree of burns are blisters not formed on the skin?
b)	Give a reason why a person who has developed blisters after getting burnt should regularly take enough water.
c)	Why is it dangerous to break the blisters on skin after getting burnt?
d)	What first aid can you give a person who has got burnt?
. a)	Name the blood vessel that drains blood from the lungs.
b)	Give a reason why blood from the heart flows to the lungs.
c)	Write down any one condition under which the heart beat of a normal person can increase.
	State one way through which the heart can be kept in proper working condition
